<b>Medical Management of Chemical Casualties Supplemental Training Materials V. 3.00 CD-ROM</b>	This product is designed primarily for sustainment training in the medical management of chemical casualties. By listening to didactic instruction while viewing PowerPoint slides (MMCC Fundamentals), students obtain core content on the medical management of chemical casualties. The additional materials contained on the CD support the instructional material (textbook, handbooks to include the Medical NBC Battlebook, video segments, casualty assessment scenarios, related published work). The Medical Management of Nerve Agent Casualties Module I is also on the CDROM.
